

Cyber Security — Course Syllabus

Learn ethical hacking, network security and cyber attack prevention.

Duration	5 Months	Level	Intermediate
----------	----------	-------	--------------

Tools & Technologies Covered

Kali Linux, Wireshark, Nmap, Metasploit, Burp Suite, Firewalls

Course Modules

Module 1: Networking & Security Fundamentals

- TCP/IP, DNS, and network protocols
- Firewalls, VPNs and IDS/IPS
- Security policies and risk assessment

Module 2: Ethical Hacking Basics

- Reconnaissance and scanning with Nmap
- Vulnerability assessment
- Introduction to Kali Linux tools

Module 3: Web & Application Security

- OWASP Top 10 vulnerabilities
- Web application penetration testing with Burp Suite
- Secure coding practices

Module 4: System & Network Penetration Testing

- Exploitation using Metasploit
- Privilege escalation techniques
- Traffic analysis with Wireshark

Module 5: Incident Response & Compliance

- Digital forensics basics
- Incident response planning
- Security compliance and reporting

Learning Outcomes

- Identify and assess common network and application vulnerabilities
- Perform basic penetration testing using industry-standard tools
- Understand and apply cyber attack prevention strategies
