

.NET Developer — Course Syllabus

Learn C#, ASP.NET, MVC, SQL Server and build enterprise web applications.

Duration	5 Months	Level	Intermediate
----------	----------	-------	--------------

Tools & Technologies Covered

C#, ASP.NET Core, MVC, Entity Framework, SQL Server, Web API, IIS

Course Modules

Module 1: C# Fundamentals

- Variables, data types, operators and control flow
- Object-oriented programming: classes, inheritance, interfaces
- Collections, LINQ and exception handling

Module 2: ASP.NET Core & MVC

- MVC architecture and routing
- Razor views and layouts
- Model binding, validation and filters

Module 3: Database with SQL Server & Entity Framework

- Relational database design and T-SQL
- Entity Framework Core: migrations and LINQ queries
- CRUD operations and repository pattern

Module 4: Web API & Enterprise Practices

- Building and consuming RESTful Web APIs
- Authentication and authorization (JWT, Identity)
- Deployment to IIS and cloud basics

Module 5: Capstone Project

- Design and build a full enterprise web application
- Code review, testing and deployment

Learning Outcomes

- Build enterprise-grade web applications using ASP.NET Core MVC
- Design and query relational databases with SQL Server
- Develop and secure RESTful Web APIs
- Apply industry-standard coding and deployment practices
